

# Thermodynamics and Statistical Mechanics (PHYS 486) Syllabus

Taner Edis

Fall 2018

## 1 How to Find Me

The best way to reach me is [e-mail](mailto:edis@truman.edu), [edis@truman.edu](mailto:edis@truman.edu). My office phone is 785-4583, but I don't check messages often.

My office is MG 3004, and my definite office hours are: Tuesdays and Thursdays: 13:30–14:50, Wednesdays: 14:30–15:20. I will almost always be around from 10:30 to 11:45 on Tuesdays and Thursdays as well, but it's just possible that if something else comes up I won't be there—email me ahead of time to make sure. You can also find me in my office at other, less regular times. Check my [calendar](https://edis.sites.truman.edu/schedule/) ([edis.sites.truman.edu/schedule/](https://edis.sites.truman.edu/schedule/)) to see when might be best—email me and we'll figure out what is the best time.

I will be using the web to post course-related notices and documents. Bookmark the course page: [edis.sites.truman.edu/thermo/](https://edis.sites.truman.edu/thermo/).

## 2 Course Description

Thermodynamics is one of the most practical areas of physics. It involves macroscopic quantities that are experimentally accessible and described by a mostly familiar mathematical apparatus. And then there is statistical mechanics, which roots thermodynamics in the microscopic and quantum mechanical behavior of vast numbers of particles. This is more conceptually

challenging. This course will go deeper into both thermodynamics and statistical mechanics, building on what you have seen in your previous courses. As always, physics demands plenty of math, but if you have a good understanding of what you learned in Mathematical Methods (Phys 382), that should be good enough.

### 3 Schedule

**Class:** Tuesday and Thursday 16:30–17:50, MG 1099.  
Wednesday 15:30–16:20, MG 1099.

### 4 Course materials

Your textbook will be Daniel V. Schroeder, *Thermal Physics*. I am not going to follow every detail—I picked it as a textbook so that you can see a slightly different approach than what I will present in lectures. Between me and the book I hope you will find something that will work for you.

### 5 Homework and Recitations

Your homework assignments will determine 25% of your final grade. In that case, The list of assignments follows; I will announce when each is due in class—normally about a week after we are done with each particular chapter.

I do not mind you discussing the homework with one another as well as with me. I will give hints if you come by my office and ask. However, I expect you to turn in the results of your own efforts—not group solutions, and certainly not solutions directly taken from someone else. If I find homeworks too similar to each other, especially if they make the same mistakes, you will have some explaining to do.

Before each homework set is due, we will also solve the recitation problems in class. I won't grade you on the recitations, though I will ask you to come up and solve them before the class. You don't have to get them right, and getting stuck is fine—I'll be there to help. The idea is to have me see you how you approach these things and help set you on the right path.

We will divide up the recitation problems between me and the students—I will do half of them, and students the other half. It will be up to you to decide which ones, by negotiating this during class meetings.

Chapter	Recitation	Homework
1.	21, 25, 34, 41	19, 24, 33, 44, 45, 55
2.	17, 24, 27, 33	8, 16, 23, 28, 35
3.	11, 23, 31, 36	10, 25, 34, 37
4.	2, 18	1, 16
5.	8, 35, 47, 50	9, 12, 14, 32(no d), 48, 51
6.	12, 16, 31, 48	6, 18, 19, 20(no a), 39, 42, 47
7.	16, 23	17, 24, 34, 43, 44
7.	52, 67	51, 53, 64, 66

## 6 Exams

The default option is three take-home exams with somewhat lengthy questions, each determining 25% of your final grade. If you prefer another arrangement, ask in class.

**I expect you to work on all exams strictly alone, without *any* discussion with others inside and outside of class. I also expect you not to use online resources such as web sites and discussion groups to give you hints or solutions.**

## 7 Final grades

As with every other aspect of the course, I intend to be flexible. If you get less than 50% in your overall grade, you will certainly fail, and 90% or better will certainly be an A, but otherwise, I don't want to declare rigid boundaries such as "65%–77% is a C" and so forth. This is a small class and I will get to know how you do physics fairly well. What will matter most for your grade is my professional judgement about how well you come to understand the fundamentals of thermodynamics and statistical physics.

If you want to know how you are doing, or what sort of performance on the final you would need for an A, or have similar grade-related concerns, just stop by my office and ask. I should be able to give you a fair estimate of where you stand.

## 8 Attendance Policy

You will need to be present in the classroom to do well in this course. But it's *your* responsibility to make sure you do well. I will not spend time keeping track of your attendance, and if you're not there, I will assume you have good reason to be absent. For example, if you are sick, please stay home! You don't need to tell me when you expect not to be present.

It is very hard to arrange for make-ups for exams or homework in a course like this. So I expect you will do everything possible to turn your work in on time, and so avoid later hassle for both me and yourself. I post solutions on the course web site; once they are up, it's too late to hand that work in.

Nevertheless, you may find you have missed something because of a legitimate excuse like being badly sick or a death in your family. In this case, come and speak with me, and I will decide, on a case-by-case basis, how to make up what you have missed. I will typically assign you some appropriate extra work, have you take a make-up exam in my office, or something similar.

## 9 Academic Integrity

I care about maintaining academic integrity, and I will apply all Truman policies concerning **academic dishonesty**. I expect you to be familiar with the **Student Conduct Code**.

Do not present something that is not your own work as your own, whether you get it from another student or online.

## 10 Lawyer Avoidance

The minimum investment of time by the average Truman student necessary to achieve the learning goals in this course are not less than one hour (50 minutes) of classroom instruction and a minimum of two hours of out of class student work each week per credit hour awarded or at least the equivalent of three hours (2:50) of laboratory work, internships, practica, and other academic work each week per credit hour awarded. This average time per week for an average student may have weekly variations.

If you have a disability for which you are or may be requesting an accommodation, you are encouraged to contact both your instructor and the **Disability Services** office (x4478) as soon as possible.

In each classroom on campus, there is a **poster of emergency procedures** explaining

best practices in the event of an active shooter/hostile intruder, fire, severe weather, bomb threat, power outage, and medical emergency. Students should be aware of the classroom environment and note the exits for the room and building. For more detailed information, please consult the [Emergency Guide for Academic Buildings](#). A [six-minute video](#) provides some basic information on how to react in the event there is an active shooter in your location.

Truman students, faculty, and staff can sign up for the TruAlert emergency text messaging service via TruView. TruAlert sends a text message to all enrolled cell phones in the event of an emergency at the University. To register, sign in to TruView and click on the “Truman” tab. Click on the registration link in the lower right of the page under the “Update and View My Personal Information” channel on the “Emergency Text Messaging” or “Update Emergency Text Messaging Information” link. During a campus emergency, information will also be posted on the [TruAlert website](#).

Truman State University and its faculty are committed to supporting our students and fostering an environment that is free from bias, discrimination, and harassment. If you have encountered any form of sexual misconduct (e.g., sexual assault, sexual harassment, stalking, domestic or dating violence), we encourage you report this to the University. If you speak with a faculty member about an incident of misconduct, that faculty member is a “mandated reporter” and must notify Truman State University’s Title IX Coordinator (Violette Hall 1308, 785-4354) and share the basic facts of your experience. The Title IX Coordinator will then be available to assist you in understanding all of your options and in connecting you with resources both on and off campus. If you would prefer to have a confidential conversation about an experience, the counselors at University Counseling Services are *not* mandated reporters and they can be reached at 660-785-4014. For after-hours crisis counseling, call 660-665-5621. For more information regarding Truman’s policies and procedures relating to any form of gender discrimination, please consult Truman’s [Non-discrimination Policy](#) and [Complaint Reporting and Resolution Procedure](#).

Education records are subject to the Family Education Right to Privacy Act ([FERPA](#)). As a result, course grades, assignments, advising records, etc. cannot be released to third parties without your permission. There are, however, several exceptions about which you should be aware. For example, education records can be disclosed to employees or offices at Truman who have an “educational need to know.” These employees and offices may include your academic advisor, the Institutional Compliance Officer, the Registrar’s Office, or Student Affairs depending on the type of information.

Behavior that persistently or flagrantly interferes with classroom activities is considered disruptive behavior and may be subject to disciplinary action. Such behavior inhibits other students’ ability to learn and an instructor’s ability to teach. A student responsible for disruptive behavior may be asked to leave class pending discussion and resolution of the problem and may be reported to the Office of Student Conduct.
